

Art Unit: 3632

This correspondence is in response to applicant's reply filed on 10/19/2009. Claims 1-8 and 10-11 are pending.

DETAILED ACTION

Allowable Subject Matter

Claims 1-8 and 10-11 are allowed.

Reasons for Allowance

The reason for the allowance of the claims in this case, is the trough-shaped outer bearing surface, now included in all the independent claims, in combination with the other elements recited, which is not found in the prior art of record. The common definition of trough is understood to mean a long, narrow channel. Taubmann et al., fails to teach this feature, and therefore is overcome by the independent claim.

Conclusion

In addition to the prior art of record, the Examiner submits the Notice of References Cited (PTO-892), which discloses additional vehicle seat supports.
